Professional Summary

Experienced Lead Quality Assurance Engineer with many years of working in the financial sector. Highly focused and detail-oriented, with great problem-solving skills and a very strong technical sense. A team player, I'm experienced at working both as part of the team and as the team lead, with a proven track record of establishing a team from the ground up, including employee training and creating correct QA practices within a company.

Employment History

Capitalise.ai, Tel Aviv — QA Team lead
APRIL 2016 – PRESENT

Established the testing and quality lifecycle from the very beginning of the start up company, including implementing testing tools and methodologies. Worked closely with Product, Support and Development teams, both in house and overseas. Managed a small team of QA, while maintaining 90% hands on, performing manual tests on both client and server side, on web and mobile applications, including integration tests, data integrity validations, performance testing, functionality, etc. Deployed Features and versions to QA environment via Azure DevOps. Active participation in all company's projects, from planning and preparation, to active deployment to clients, including test and feature planning, reviews and design process. Managed the work of the QA team, including training, monitoring the work progress and ensuring the correctness of the results on all company projects.

Iron Source, Tel Aviv— Backend QA engineer
JUNE 2014- MARCH 2016

Duties include planning and executing tests for the mobile backend team. Conducting manual tests on distinct servers (e.g., Ad, vast, bid servers) to meet specific requirements. These tests entail integrating with multiple ad networks, analyzing ads traffic through various APIs, assessing the application's business logic, and analyzing the test results. Client tests are performed on different web and mobile browsers and applications. Deploying versions to the QA environment by utilizing GitHub.

SuperDerivatives, Tel Aviv —Market Data QA Engineer
JUNE 2013 - JUNE 2014

Responsibilities encompass planning and executing tests for market data, comprising data validation tests for various financial derivatives within the company's pricing systems. These tests are conducted in response to changes in the capital market exchange and involve different types of assets, including Interest Rates, Equities, Commodities, etc. Manual testing is performed to verify integration with multiple market data providers and APIs. Approving and uploading versions to QA and Production. Overseeing and resolving technical issues in the production environment.

Qualitest, Bank Hapoalim, Tel Aviv —QA Engineer
FEB 2012 - JUNE 2013

Project involvement in the Bank Hapoalim Capital Market website and Mobile application. Ensuring thorough testing of the Capital Market mobile application from its design phase to its first production release. This involves creating STD (Software Test Documentation), STP (Software Test Plan), and STR (Software Test Report) for all mobile and web projects. Conducting tests for data validation, compatibility, functionality, regression, UI, and more. Implementing test cases across different browsers and various mobile platforms.

Godlfarb Seligman, Tel Aviv —Secretary
MAY 2010 - JAN 2011

Secretary at a law firm with 3 partners and 15 associate lawyers. Submitting court applications, preparing claim letters for companies, scheduling appointments, etc.

Bank Discount, Tel Aviv —Banker and Team Leader
NOV 2004- OCT 2009

Serving as a banker at the call center of Discount Bank, responsible for assisting clients with account-related information and performing actions, including managing clients' capital market portfolios. During the last 2 years, promoted to Team Leader of a 15-person support team for the bank's capital market website. This role involved overseeing customer transactions, handling complaints, approving high-value transactions, and rectifying incorrect orders made by clients or the team.

Super Pharm, Ashqelon —Inventory Management
JAN 2001- DEC 2002

Inventory management and assistance for the Back Office manager.

Karni Terminal, Gaza Border —Border Security
JAN 2000- JAN 2001

Border Security at Karni terminal, border of Gaza stripe.

Gevaram Envelopes, Kibbutz Gevaram —Manufacturer
JAN 1996 - APR 1997, FEB 1999 - JAN 2000

Manufacturer at Gevaram factory, which manufactures envelopes.

Military

Air Force Intelligence investigator, Tel Aviv— Sergeant
APR 1997 - JAN 1999

Air intelligence investigator at Sde-Dov base. Sergeant rank.

Education

Bar Ilan University, Ramat Gan - Bachelor of Business Administration (B.A.)
OCT 2008 - OCT 2011

Graduated from Bar-Ilan University with a major in Logistics and Economics.

Ben Gurion University, Beer Sheva —Medical Laboratory Sciences (B.Med.Lab.Sc.) - Not Graduated
